A unique set of four fine prints which are quality reproductions from the pages of a catalogue first published in the middle of the 19th Century. They are mounted in frames and glazed. Overall Size 21.5in. x 17.5in.

Monument Tools Ltd. have themselves a history of well over a hundred years. During that time they have been enthusiasts in the history of hand tools. This has led them to present a limited edition of 350 sets of four reproduction prints taken from the pages of an authentic Richard Timmins's catalogue dated circa 1855.

The catalogue contains prices and beautifully engraved representations of the tools that Richard Timmins made. From it, John Collier, Chairman of Monument Tools, has personally selected and signed to authenticate four pages which will be of special interest to everyone associated with hand tools be they collector or user, manufacturer or distributor.

Printed in sepia on high quality beige cartridge paper, glazed in polished wood and gilt frames each print is 21.5 inches x 17.5 inches overall and would grace any boardroom, showroom or private house.
